Pigment Prints

Archival Pigment Prints using Epson UltraChrome K3 inks created via the latest Inkjet Technology. These prints are proven to be more Archival than traditional C-prints when cared for properly. If you are interested in Archival documentation please visit the Wilhelm Certification website: http://www.wilhelm-research.com/

We offer the finest canvas and Museum Grade Papers.

Final Tests are important and required to use for guide matches in reprint scenarios and addition printing done at a later date. We cannot stress the importance of ordering a final test print to store with your digital file.

Normal Turn Around for Pigment Prints is based on quantity and work required. In general, tests require 3 to 5 business days and finals require up to 5 to 10 business days from approval to produce. Every project has different needs that affect the timeline, so after your initial consult we can give you a more accurate turnaround.

The final print file and final test print is required for reprint orders. All files are purged from our servers after 14 days. Please back up your files on your computer and hard drive.

Long term storage of files can be arranged with special rates for our fine art clients: 10G $75, 20G $125, or 30G $150 per year.

50% Deposit required for all work requested
Prices subject to change at anytime
